## Cumulative Index, 1975-1984

Compiled and edited by Carla J. Funk, Phyllis H. McLaren, Mary Kay Tinerella, and Pam Wood

This ten-year cumulative index covers the major contributions in the *Archives of Ophthalmology* during the period 1975 through 1984. Correspondence and book reviews have been deleted due to space limitations, but may be found in the annual indexes for each volume and through national indexing services. In the author index, the full citation appears under the first author only; for coauthors, the reader is referred to the first author's name. The subject listings have been edited to reflect the most recent terminology; for example, retrolental fibroplasia contributions will be found under the heading 'Retinopathy of Prematurity.'
